PRODUCT NAME: **PULSAR® PLUS DRY CHLORINATOR BRIQUETTES** EPA Registration Number: 1258-1179

1. PRODUCT AND COMPANY IDENTIFICATION

Arch Chemicals, Inc. 501 Merritt 7 PO Box 5204 Norwalk, CT 06856-5204 REVISION DATE: SUPERCEDES: 04/29/2010 11/06/2009

MSDS Number: SYNONYMS: CHEMICAL FAMILY: DESCRIPTION / USE: FORMULA:

00000000844 None Hypochlorite Sanitizer and Oxidizer Not Applicable/Mixture

2. HAZARDS IDENTIFICATION

OSHA Hazard Classification:	Toxic by inhalation., Corrosive to eyes and skin, Lung toxin, Oxidizer	
Routes of Entry: Chemical Interactions: Medical Conditions Ag		Inhalation, skin, eyes, ingestion No known or reported interactions. Asthma, respiratory and cardiovascular disease

Human Threshold Response Data

Odor Threshold Approximately 1.4 mg/m3 (based on odor threshold of chlorine)

Irritation Threshold Approximately 13-22 mg/m3 (based on irritation threshold of chlorine)

Hazardous Materials Identification System / National Fire Protection Association Classifications				
Hazard Ratings :	<u>Health</u>	Flammability	Physical / Instability	<u>PPI / Special</u> hazard.
HMIS	3	0	1	
NFPA	3	0	1	OX

Immediate (Acute) Health Effects

Inhalation Toxicity:	HARMFUL IF PRODUCT IS INHALED IN HIGH CONCENTRATIONS. CAUSES BURNS TO RESPIRATORY TRACT. Inhalation of dust or vapor from this product can be irritating to the nose, mouth, throat and lungs. In confined areas, mechanical agitation can result in high levels of dust, and reaction with incompatible materials (as listed in Section 10) can result in high concentrations of chlorine vapor, either of which may result in burns to the respiratory tract, producing lung edema, shortness of breath, wheezing, choking, chest pains, impairment of lung function
Skin Toxicity:	and possible permanent lung damage. DRY MATERIAL CAUSES MODERATE SKIN IRRITATION. WET MATERIAL CAUSES SKIN BURNS. Dermal exposure to dry material causes moderate skin irritation characterized by redness and swelling. Dermal exposure to wet material can cause severe irritation and/or burns characterized by redness, swelling and scab formation. Prolonged skin exposure may cause permanent damage.
Eye Toxicity:	CAUSES BURNS TO EYES. Severe irritation and/or burns can occur following eye exposure. Direct contact may cause impairment of vision and corneal damage.
Ingestion Toxicity:	MODERATELY TOXIC IF SWALLOWED. CAUSES BURNS TO DIGESTIVE TRACT. Irritation and/or burns can occur to the entire gastrointestinal tract, including the stomach and intestines, characterized by nausea, vomiting, diarrhea, abdominal pain, bleeding, and/or tissue ulceration or perforation. Significant exposure to this material can lead to serious health effects and/or death.
Acute Target Organ Toxicity:	This product is corrosive to all tissues contacted and upon inhalation, may cause irritation to mucous membranes and respiratory tract., The dry material is irritating to the skin. However when wet, it will produce burns to the skin.

Prolonged (Chronic) Health Effects

Carcinogenicity:	This product is not known or reported to be carcinogenic by any reference source including IARC, OSHA, NTP or EPA.
Reproductive and	No reproductive or developmental risk to humans is expected from
Developmental Toxicity:	exposure to this product.
Inhalation:	Repeated inhalation exposure may cause impairment of lung function and permanent lung damage.
Skin Contact:	Effects similar to those from acute exposure. In addition, chronic exposure to wet material may cause effects secondary to tissue destruction.
Ingestion:	There are no known or reported effects from chronic ingestion except for effects similar to those experienced from single exposure. The acute corrosivity of this product, makes chronic ingestion of significant amounts unlikely.
Sensitization:	This material is not known or reported to be a skin or respiratory sensitizer.
Chronic Target Organ Toxicity:	There are no known or reported effects from repeated exposure except those secondary to burns.
Supplemental Health Hazard Information :	No additional health information available.
PUILSAR® PLUS DRY CHLORINAT	

3. COMPOSITION / INFORMATION ON INGREDIENTS

CAS OR CHEMICAL NAME	CAS#	<u>% RANGE</u>
CALCIUM HYPOCHLORITE	7778-54-3	60 - 80
SODIUM CHLORIDE	7647-14-5	10 - 20
CALCIUM CHLORATE	10137-74-3	0 - 5
CALCIUM CHLORIDE	10043-52-4	0 - 5
CALCIUM HYDROXIDE	1305-62-0	0 - 4
CALCIUM CARBONATE	471-34-1	0 - 4
1,2,4-BUTANETRICARBOXYLIC ACID, 2- PHOSPHONO-, SODIUM SALT	40372-66-5	0.2 - 0.8
Water	7732-18-5	4.0 - 8.5

4. FIRST AID MEASURES

General Advice:	Call a poison control center or doctor for treatment advice. For 24-hour emergency medical assistance, call Arch Chemical Emergency Action Network at 1-800-654-6911. Have the product container or label with you when calling a poison control center or doctor, or going for treatment.
Inhalation:	IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible. Call a poison control center or doctor for further treatment advice.
Skin Contact:	IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

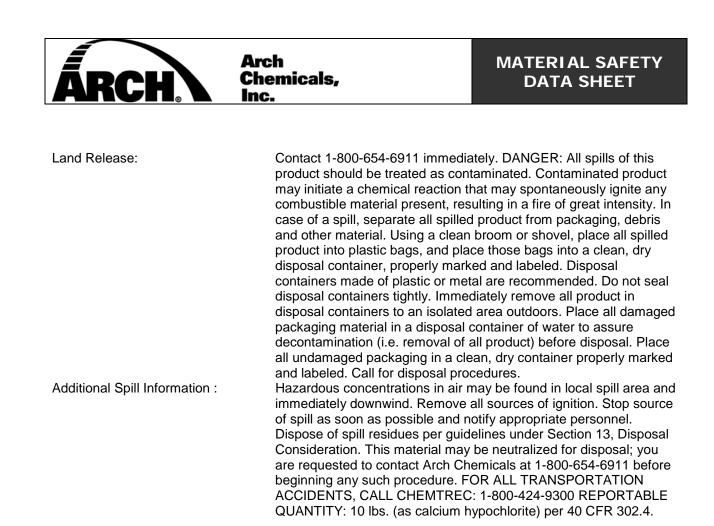

Eye Contact:	IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20
	minutes. Remove contact lenses, if present, after the first 5 minutes, then
	continue rinsing eye. Call a poison control center or doctor for treatment advice.
Ingestion:	IF SWALLOWED: Call a poison control center or doctor immediately for treatment
	advice. Have person sip a glass of water if able to swallow. Do not induce
	vomiting unless told to do so by a poison control center or doctor. Do not give
	anything by mouth to an unconscious person.
Notes to Physician:	Probable mucosal damage may contraindicate the use of gastric lavage.

5. FIRE FIGHTING MEASURES

Flammability Summary (OSHA):	This product is chemically reactive with many substances. Any contamination of the product with other substances by spill or otherwise may result in a chemical reaction and fire., This product is a strong oxidizer which is capable of intensifying a fire once started., Product is not known to be flammable, combustible or pyrophoric.
Flammable Properties	
Flash Point:	Not applicable
Autoignition Temperature:	Not applicable
Extinguishing Media:	Water only. Do not use dry extinguishers containing ammonium compounds.
Fire Fighting Instructions:	Use water to cool containers exposed to fire. See Section 6 for protective equipment for fire fighting.
Upper Flammable / Explosive Limit,	% in air: Not applicable
Lower Flammable / Explosive Limit,	% in air: Not applicable

6. ACCIDENTAL RELEASE MEASURES

Personal Protection for Emergency Situations:	Response to a large quantity spill (100 pounds or greater) or when dusting or decomposition gas exposure could occur requires the use of a positive pressure full face supplied air repirator or self contained breathing apparatus (SCBA), chemical resistant gloves, coveralls and boots. In case of fire, this personal protective equipment should be used in addition to normal fire fighter equipment.
Spill Mitigation Procedures	
Air Release:	Vapors may be suppressed by the use of water fog. All water utilized to assist in fume suppression, decontamination or fire suppression may be contaminated and must be contained before disposal and/or treatment.
Water Release:	This product is heavier than water. This material is soluble in water. Monitor all exit water for available chlorine and pH. Advise local authorities of any contaminated water release.

7. HANDLING AND STORAGE

Handling:	Avoid inhalation of dust and fumes. Do not take internally. Avoid contact with skin, eyes and clothing. Upon contact with skin or eyes, wash off with water. Remove contaminated clothing and wash before reuse.
Storage:	Keep product tightly sealed in original containers. Store product in a cool, dry, well-ventilated area. Store away from combustible or flammable products. Keep product packaging clean and free of all contamination, including, e.g. other pool treatment products, acids, organic materials, nitrogen-containing compounds, dry powder fire extinguishers (containing mono-ammonium phosphate), oxidizers, all corrosive liquids, flammable or combustible materials, etc.
Shelf Life Limitations:	Do not store product where the average daily temperature exceeds 95° F. Storage above this temperature may result in rapid decomposition, evolution of chlorine gas and heat sufficient to ignite combustible products. Shelf life (that is, the period of time before the product goes below stated label strength) is determined by storage time and temperatures. Store in a cool, dry and well ventilated area. Prolonged storage at elevated temperatures will significantly shorten the shelf life. Storage in a climate controlled storage area or building is recommended in those areas where extremes of high temperature occur.

Incompatible Materials for Storage:	Do not allow product to come in contact with other materials,
	including e.g. other pool treatment products, acids, organic
	materials, nitrogen-containing compounds, dry powder fire
	extinguishers (containing mono-ammonium phosphate), oxidizers,
	all corrosive liquids, flammable or combustible materials, etc. A
	chemical reaction with such substances can cause a fire of great
	intensity.
Do Not Store At temperatures Above	: Average daily temperature of 35° C / 95° F. Storage above this temperature may result in rapid decomposition, evolution of chlorine gas and heat sufficient to ignite combustible products.
	chionne gas and heat suncient to ignite compustible products.

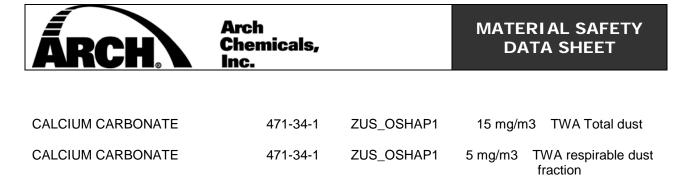

8. EXPOSURE CONTROLS / PERSONAL PROTECTION

Ventilation:	Local exhaust ventilation or other engineering controls are normally required when handling or using this product to keep airborne exposures below the TLV, PEL or other recommended exposure limit.

Protective Equipment for Routine Use of Product

Respiratory Protection :	Wear a NIOSH approved respirator if levels above the exposure limits are possible.
Respirator Type :	A NIOSH approved full-face air purifying respirator equipped with combination chlorine/P100 cartridges. Air purifying respirators should not be used in oxygen deficient or IDLH atmospheres or if exposure concentrations exceed ten (10) times the published limit.
Skin Protection :	Wear impervious gloves to avoid skin contact. A full impervious suit is recommended if exposure is possible to a large portion of the body. A safety shower should be provided in the immediate work area.
Eye Protection:	Use chemical goggles. Emergency eyewash should be provided in the immediate work area.
Protective Clothing Type:	Neoprene, Nitrile, Natural rubber (This includes: gloves, boots, apron, protective suit)
Exposure Limit Data	

<u>CHEMICAL NAME</u> CALCIUM HYPOCHLORITE	<u>CAS #</u> 7778-54-3	Name of Limit ARCH-ROEG*	<u>Exposure</u> 1 mg/m3 TWA

9. PHYSICAL AND CHEMICAL PROPERTIES

Physical State: Form Color: Odor: Molecular Weight: Specific Gravity : pH : Boiling Point: Freezing Point: Melting Point: Density: Vapor Pressure: Vapor Density: Viscosity: Fat Solubility: Solubility in Water:	solid Tablet white Chlorine-like 143.00 Not applicable 10.4 - 10.8 (1% solution in neutral, distilled water) (@ 25 Deg. C) Not applicable Not applicable
Partition coefficient n- octanol/water: Evaporation Rate: Oxidizing: Volatiles, % by vol.: VOC Content HAP Content	Not applicable Oxidizer Not applicable Not applicable Not applicable Not applicable

10. STABILITY AND REACTIVITY

Stability and Reactivity Summary:	Product is not sensitive to mechanical shock or impact. Product is not sensitive to electrical static discharge. Product will not undergo hazardous polymerization. Product is an NFPA Class 3 oxidizer which can cause a severe increase in fire intensity. Not pyrophoric. Not an organic peroxide. If subjected to excessive temperatures, the product may undergo rapid decomposition, evolution of chlorine gas, and heat sufficient to ignite combustible substances. If product is exposed to small amounts of water, it can react violently to produce heat and toxic gases and spatter. Use copious amounts of water for fires involving this product.			
Conditions to Avoid:	Do not store next to heat source, in direct sunlight, or elevated			
	storage temperature. Do not store where the daily average			
PLU SAR® PLUS DRY CHLORINATOR BRIQUETTES				

Chemical Incompatibility:	temperature exceeds 95 °F. Prevent ingress of humidity and moisture into container or package. Always close the lid. This product is chemically reactive with many substances, including, e.g., other pool treatment products, acids, organics, nitrogen-containing compounds, dry powder fire extinguishers (containing mono-ammonium phosphate), oxidizers, corrosive ,flammable or combustible materials. Do not allow product to contact any foreign matter, including other water treatment products. Contamination or improper use may cause a fire of great intensity, explosion or the release of toxic gases. If product is exposed to small amounts of water, it can react violently to produce heat and toxic gases and spatter.
Hazardous Decomposition Products:	Chlorine
Decomposition Temperature:	170 - 180 DEG°C - , 338 - 356 DEG°F-

11. TOXICOLOGICAL INFORMATION

Component Animal Tox	icology
Oral LD50 value: CALCIUM HYPOCHLORITE SODIUM CHLORIDE CALCIUM CHLORIDE CALCIUM HYDROXIDE	LD50 (65% calcium hypochlorite) 850 mg/kg Rat LD50 = 3,000 mg/kg Rat LD50 = 1,000 mg/kg Rat LD50 = 7,340 mg/kg Rat
Dermal LD50 value: CALCIUM HYPOCHLORITE SODIUM CHLORIDE CALCIUM CHLORIDE CALCIUM HYDROXIDE	LD50 (65% calcium hypochlorite) > 2,000 mg/kg Rabbit LD50 > 10,000 mg/kg Rabbit LD50 = 2,630 mg/kg Rat No data
Inhalation LC50 value: CALCIUM HYPOCHLORITE CALCIUM HYPOCHLORITE SODIUM CHLORIDE CALCIUM CHLORIDE CALCIUM HYDROXIDE	Inhalation LC50 1 h (65% calcium hypochlorite), (Nose Only) = 2.04 MG/L Rat Inhalation LC50 4 h (65% calcium hypochlorite), (Nose Only) = 0.51 MG/L Rat Inhalation LC50 1 h > 42 MG/L Rat No data No data
	LD50 Approximately 800 mg/kg Rat LD50 > 2,000 mg/kg Rabbit Inhalation LC50 1.00 h (Nose Only) > 2.04 MG/L Rat Inhalation LC50 4 h (Nose Only) > 0.51 MG/L Rat DRY MATERIAL CAUSES MODERATE SKIN IRRITATION., WET MATERIAL CAUSES SKIN BURNS. ILORINATOR BRIQUETTES 9/2010 Page 8 of 14

Eye Irritation: Skin Sensitization:	Corrosive to eyes. This material is not know	osive to eyes. material is not known or reported to be a skin or respiratory sensitizer.		
Acute Toxicity: Subchronic / Chronic	irritation to mucous mem the skin. However when	s product is corrosive to all tissues contacted and upon inhalation, may cause ation to mucous membranes and respiratory tract. The dry material is irritating to skin. However when wet, it will produce burns to the skin. are are no known or reported effects from repeated exposure except those		
Toxicity:	secondary to burns.	eponed enects nom repeated exposure except those		
Reproductive and Developmental Toxicity		te has been tested for teratogenicity in laboratory f this study have shown that calcium hypochlorite is not a		
CALCIUM CHL	ORIDE	Not known or reported to cause reproductive or developmental toxicity.		
Mutagenicity:	mice, and it did not has been reported t has, however, been animals based on r frequently are inapp chemicals due to a produces mutations concentrations used	te has been tested in the Dominant lethal assay in male induce a dominant lethal response. Calcium hypochlorite to produce mutagenic activity in two in vitro assays. It a shown to lack the capability to produce mutations in esults from the micronucleus assay. In vitro assays propriate to judge the mutagenic potential of bactericidal high degree of cellular toxicity. The concentration which is in these in vitro assays is significantly greater than the d for disinfection. Based on high cellular toxicity in in vitro is of mutagenicity in animals, the risk of genetic damage d not significant.		
CALCIUM CHL		This product was determined to be non-mutagenic in the Ames assay. It was also shown to be non- clastogenic in the chromosomal aberration test.		
Carcinogenicity:	source including IA exposed dermally 3 hypochlorite. Histo incidence of tumors reviewed studies co classified hypochlor carcinogenicity to h	known or reported to be carcinogenic by any reference RC, OSHA, NTP or EPA. One hundred mice were times a week for 18 months to a solution of calcium pathological examination failed to show an increased s. IARC (International Agency for Research on Cancer) onducted with several hypochlorite salts. IARC has rite salts as having inadequate evidence for umans and animals. IARC therefore considers o be not classifiable as to their carcinogenicity to humans a)		
CALCIUM CHL		This chemical is not known or reported to be carcinogenic by any reference source including IARC, OSHA, NTP, or EPA.		

12. ECOLOGICAL INFORMATION

Overview:

Highly toxic to fish and other aquatic organisms.

Ecological Toxicity Values for: CALCIUM HYPOCHLORITE

Bluegill	-	(nominal, static). 96 h LC50 0.088 mg/l	
Rainbow trout (Salmo gairdneri),	-	(nominal, static). 96 h LC50 0.16 mg/l	
Daphnia magna,	-	(nominal, static). 48 h LC50 0.11 mg/l	
Bobwhite quail	-	Dietary LC50 > 5,000 ppm	
Mallard ducklings	-	Dietary LC50 > 5,000 ppm	
Bobwhite quail	-	Oral LD50 3,474 mg/kg	
Ecological Toxicity Values for: CALCIUM CHLORIDE			

E

Bluegill	-	(nominal, static). 96 h LC50 = 10,650 mg/l
Mosquito fish	-	(nominal, static). 96 h LC50 = 13,400 mg/l
Fathead minnow (Pimephales		(nominal, static). 96 h LC50 = 4,630 mg/l
promelas),		
Daphnia magna,	-	(nominal, static). 48 h LC50= 2,770 mg/l
Ceriodaphnia dubia		(nominal, static). 48 h LC50= 1,830 mg/l
Nitzschia linearis (diatom)	-	(nominal, static). 5 day LC50 = 3,130 mg/l

13. DISPOSAL CONSIDERATIONS

CARE MUST BE TAKEN TO PREVENT ENVIRONMENTAL CONTAMINATION FROM THE USE OF THE MATERIAL. THE USER OF THE MATERIAL HAS THE RESPONSIBILITY TO DISPOSE OF UNUSED MATERIAL, RESIDUES AND CONTAINERS IN COMPLIANCE WITH ALL RELEVANT LOCAL, STATE AND FEDERAL LAWS AND REGULATIONS REGARDING TREATMENT, STORAGE AND DISPOSAL FOR HAZARDOUS AND NONHAZARDOUS WASTES.

Waste Disposal Summary :	If this product becomes a waste, it meets the criteria of a hazardous waste as defined under 40 CFR 261 and would have the following EPA hazardous waste number: D001.If this product becomes a waste, it will be a hazardous waste which is subject to the Land Disposal restrictions under 40 CFR 268 and must be managed accordingly.
Disposal Methods :	As a hazardous solid waste it should be disposed of in accordance

-	with local, state and federal regulations.

Potential US EPA Waste Codes : D001
